| 400 mm | Metric | $>$ | 5 | 6 | 30 | 11-32.25 | 1,200' | 360 |

## METRIC BULK PACK PACKAGING STANDARDS

## 1. Bulk Packs:

A. Bulk packs - for packaging all metric straight lengths between $9.843^{\prime \prime}$ OD through $15.748^{\prime \prime}$ OD pipe.
B. Lumber Size and Placement:
2. For industrial pipe packs the packs shall be constructed using 2 "x 6 " bottom boards (Note: 2 "x 6 " boards actually have a thickness of approximately $1.5^{\prime \prime}$.) For gas products plants will use 3 " X 4 " lumber. Grooved boards are preferable, but not mandatory as the banding will create a notch in some soft woods securing the banding in place. Plants may use one $3^{\prime \prime} \times 4^{\prime \prime}$ for bottom boards for any product line in diameters $3^{\prime \prime}$ and 4 " to help with pack stability as long as they don't exceed height restrictions. Hardwood or softwood is acceptable.
A.
(1) Bottom board lengths are as follows.

| Pipe Size | Board Length |
| :---: | :---: |
| 250 mm | $43^{1 / /^{\prime \prime}}$ |
| 280 mm | $48^{\prime \prime} / 37^{\prime \prime}$ |
| 315 mm | $42^{\prime \prime}$ |
| 355 mm | $46^{\prime \prime} / 42^{\prime \prime}$ |
| 400 mm | $36^{\prime \prime}$ |

(2) Bottom boards are spaced at six (6) equidistant locations for 12 meter joints
(3) Bottom boards are spaced at six (6) equidistant locations for forty-foot ( $40^{\prime}$ ) joints.

## Packaging Information - Metric Bulk Packs

B. Banding:

Each band on a bundle shall be tightened to the same approximate tension. Use at least one (1) $5 / 8$ " $X$ $.035,3 / 4$ " X . 040 or $3 / 4$ " X . 050 polyester banding per bottom board.
E. Storage:

Special care must be taken when staging bulk packs in storage.
F. Transport:

Performance Pipe Transport Strapping Policy establishes minimum requirements regarding the number of trucker straps used in all transportation providers to secure bulk packs. The policy also contains conditions regarding the tightening of straps after a carrier leaves a Performance Pipe facility.
G. Tarping:

All pipe series may, at customer request, be smoked tarped, $1 / 3$ tarped or full tarped depending on customer requirement.

Performance Pipe's definition of

- Smoke tarp- at least 8' back on top and 4' in front and on sides
- $1 / 3$ tarp- covering all product at minimal $1 / 3$ of the load
- Full tarp- covering all product.

An individual customer requirement may override this definition.
(Customer requested tarping of any load will incur additional expense to the customer. Any damage caused by tarp is the sole responsibility of the customer requesting a tarp.)
H. End Caps:

Place end caps (or plugs) on all 6500-8100-8300 and 5300 series products or if the customer requests end caps.

METRIC BULK PACKAGE CONSTRUCTION

250 mm 5jts - 5jts

355 mm 4jts - 3 jts

280 mm 5jts - 4jts

400 mm 3jts - 3jts

315 mm 4jts - 4jts

## Packaging Information - Metric Bulk Packs

## METRIC

BULK PACK TRUCKLOAD PACKAGE STANDARDS

400 mm 30 jts per truck

NOTE: LOADS AND MATERIALS NOT DRAWN TO SCALE. CERTAIN DR'S MAY BE LIMITED BY WEIGHT. NO LOADS ARE TO EXCEED 45,000 LBS.
