

A close-up photograph of a woman with brown hair and black-rimmed glasses. She is pinching her nose with her right hand, looking slightly to the side with a concerned expression. The background is a plain, light-colored wall.

Propane has
an odor for a

Safety Reason

Some combustible gases, like propane, are odorless and colorless. A chemical odorant is added to propane to give it a distinctive smell so the presence of propane can be detected.

Always be sensitive to the slightest smell.
Learn to recognize the odor of propane gas.

To become familiar with the smell of propane,
call your propane dealer for a scratch-and-
sniff brochure, and ask to smell the propane
when your propane dealer fills your tank.

Specialty Chemicals

Performance by design. Caring by choice.™
