MEDICAL APPLICATION CAUTION: Do not use this material in medical applications involving permanent implantation in the human body or permanent contact with internal body fluids or tissues fluids or tissues.

Do not use this material in medical applications involving brief or temporary implantation in the human body or contact with internal body fluids or tissues unless the material has been provided directly from Chevron Phillips Chemical Company LP or its legal affiliates under an agreement which expressly acknowledges the contemplated use.

Chevron Phillips Chemical Company LP and its legal affiliates makes no representation, promise, express warranty or implied warranty concerning the suitability of this material for use in implantation in the human body or in contact with internal body fluids or tissues.

SECTION 2: Hazards identification

2.1

Classification of the substance or mixture REGULATION (EC) No 1272/2008

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

2.2

Labeling (REGULATION (EC) No 1272/2008)

Not a hazardous substance or mixture according to Regulation (EC) No 1272/2008.

2.3

2.0	Other hazards Results of PBT and vPvB assessment	:	This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.
	Endocrine disrupting properties	:	The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

SECTION 3: Composition/information on ingredients

3.1 - **3**.2

Substance or Mixture

Hazardous ingredients

Marlex® HHM 5502BN Polyethylene

Revision Date 2023-08-07

Version 1.12

Copolymer

Contains no hazardous ingredients according to GHS. :

	CTION 4: First aid measures			
4.1	Description of first-aid measures			
	lf inhaled	:	Move to fresh air in case of accidental inhalation of dust or fumes from overheating or combustion. If symptoms persist, call a physician.	
	In case of skin contact	:	If the molten material gets on skin, quickly cool in water. Seek immediate medical attention. Do not try to peel the solidified material from the skin or use solvents or thinners to dissolve it.	
	In case of eye contact	:	In the case of contact with eyes, rinse immediately with plenty of water and seek medical advice.	
	If swallowed	:	Do not induce vomiting without medical advice.	
4.2	Most important symptoms Notes to physician	and	l effects, both acute and delayed	
	Symptoms	:	No information available.	
4.3	Risks Indication of any immediat	: e m	No information available. edical attention and special treatment needed	
	Treatment	:	No information available.	
SEC	CTION 5: Firefighting measu	ires		
	Flash point	:	No data available	
	Autoignition temperature	:	No data available	
5.1	Extinguishing media			
	Suitable extinguishing media	:	Water. Water mist. Dry chemical. Carbon dioxide (CO2). Foam. If possible, water should be applied as a spray from a fogging nozzle since this is a surface burning material. The application of high velocity water will spread the burning surface layer. Avoid the use of straight streams that may create a dust cloud and the risk of a dust explosion. Use	
			extinguishing measures that are appropriate to local circumstances and the surrounding environment.	
5.2				
5.2	Special hazards arising fro Specific hazards during fire fighting	om t :	circumstances and the surrounding environment.	
5.2	Specific hazards during fire	om t :	circumstances and the surrounding environment. The substance or mixture Risks of ignition followed by flame propagation or secondary explosions can be caused by the accumulation of dust, e.g. on	

Marlex® HHM 5502BN Polyethylene

Ver	sion 1.12	Revision Date 2023-08-07
	Advice for firefighters Special protective : equipment for fire-fighters	Use personal protective equipment. Wear self-contained breathing apparatus for firefighting if necessary.
	Further information :	This material will burn although it is not easily ignited.
	Fire and explosion : protection	Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
	Hazardous decomposition : products	Normal combustion forms carbon dioxide, water vapor and may produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde.
SEC	CTION 6: Accidental release me	easures
6.1	Personal precautions, protect	ive equipment and emergency procedures
6.2	Personal precautions :	Sweep up to prevent slipping hazard. Avoid breathing dust. Avoid dust formation.
0.2	Environmental precautions	
	Environmental precautions :	Do not contaminate surface water. Prevent product from entering drains.
6.3	Methods and materials for con Methods for cleaning up :	n tainment and cleaning up Clean up promptly by sweeping or vacuum.
	Additional advice :	Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).
6.4	Reference to other sections	
	Reference to other sections :	For personal protection see section 8. For disposal considerations see section 13.
SEC	CTION 7: Handling and storage	
7.1	Precautions for safe handling Handling	
	Advice on safe handling :	Use good housekeeping for safe handling of the product. Keep out of water sources and sewers. Spilled pellets may create a slipping hazard. Electrostatic charge may accumulate and create a hazardous condition when handling this material. To minimize this hazard, bonding and grounding may be necessary, but may not by themselves be sufficient. At elevated temperatures (>350°F, >177°C), polyethylene can release vapors and gases, which

SDS Number:10000000723 5/15

Ver	sion 1.12		Revision Date 2023-08-07
			are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. These substances may include acetaldehyde, acetone, acetic acid, formic acid, formaldehyde and acrolein. Based on animal data and limited epidemiological evidence, formaldehyde has been listed as a carcinogen. Following all recommendations within this SDS should minimize exposure to thermal processing emissions.
	Advice on protection against fire and explosion	:	Treat as a solid that can burn. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.
7.2	Conditions for safe storage	, in	cluding any incompatibilities
	Requirements for storage areas and containers	:	Keep in a dry place. Keep in a well-ventilated place.
	Advice on common storage	:	Do not store together with oxidizing and self-igniting products.
	German storage class	:	Combustible Solids

7.3

Specific	End	Use
Use		

:	Manufacture of plastics products

SECTION 8: Exposure controls/personal protection

8.2

Exposure controls Engineering measures

Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

Personal protective equipment

Respirato	ory protection	:	No respiratory protection is normally required. If heated material generates vapor or fumes that are not adequately controlled by ventilation, wear an appropriate respirator. Use the following elements for air-purifying respirators: Organic Vapor and Formaldehyde. A positive pressure, air-supplying respirator may be appropriate if there is potential for uncontrolled release, aerosolization, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection. Dust safety masks are recommended when the dust concentration is excessive.
SDS Number:	10000000723		6/15

arlex® HHM 5502BN F	ol	yethylene
rsion 1.12		Revision Date 2023-08
Eye protection	9	Use of safety glasses with side shields for solid handling is good industrial practice. If this material is heated, wear chemical goggles or safety glasses with side shields or a face shield. If there is potential for dust, use chemical goggles.
Skin and body protection		At ambient temperatures use of clean and protective clothing is good industrial practice. If the material is heated or molten, wear thermally insulated, heat-resistant gloves that are able to withstand the temperature of the molten product. If this material is heated, wear insulated clothing to prevent skin contact if engineering controls or work practices are not adequate.
CTION 9: Physical and chemic	al p	properties
Information on basic physic	al a	nd chemical properties
Appearance		
Form	:	Pellets
Physical state Color	:	solid Opaque
Odor	:	Mild to no odor
Safety data		
Flash point	:	No data available
Lower explosion limit	:	Not applicable
Upper explosion limit	:	Not applicable
Autoignition temperature	:	No data available
Thermal decomposition	:	Low molecular weight hydrocarbons, alcohols, aldehydes, acids and ketones can be formed during thermal processing.
рН	:	Not applicable
Pour point	:	No data available
Melting point/freezing point		90-140°C (194-284°F)
Initial boiling point and boiling	:	Not applicable

Other informationConductivity: No data available

SECTION 10: Stability and reactivity

10.1

R	Reactivity	:	This material is considered non-reactive under normal ambient and anticipated storage and handling conditions of temperature and pressure.
10.2			
c	chemical stability	:	This material is considered stable under normal ambient and

and pressure.

10.3

Possibility of	hazardous	reactions
----------------	-----------	-----------

10.4	Conditions to avoid	:	Avoid prolonged storage at elevated temperature.
10.5	Materials to avoid	:	Avoid contact with strong oxidizing agents.
	Thermal decomposition	:	Low molecular weight hydrocarbons, alcohols, aldehydes, acids and ketones can be formed during thermal processing.
	Hazardous decomposition products	:	Normal combustion forms carbon dioxide, water vapor and may produce carbon monoxide, other hydrocarbons and hydrocarbon oxidation products (ketones, aldehydes, organic acids) depending on temperature and air availability. Incomplete combustion can also produce formaldehyde.
	Other data	:	No decomposition if stored and applied as directed.

Version 1.12

Revision Date 2023-08-07

SECTION 11: Toxicological information	ation
11.1 Information on toxicological ef	ifects
Marlex® HHM 5502BN Polyeth Acute oral toxicity	
Marlex® HHM 5502BN Polyeth Acute inhalation toxicity :	
Marlex® HHM 5502BN Polyeth Acute dermal toxicity :	
Marlex® HHM 5502BN Polyeth Skin irritation	ylene No skin irritation
Marlex® HHM 5502BN Polyeth Eye irritation	ylene No eye irritation
Marlex® HHM 5502BN Polyeth Sensitization	ylene Did not cause sensitization on laboratory animals.
Toxicology Assessment	
Marlex® HHM 5502BN Polyeth Specific Target Organ : Toxicity (Single Exposure)	ylene Remarks: No adverse effects expected :
Marlex® HHM 5502BN Polyeth Specific Target Organ : Toxicity (Repeated Exposure)	ylene Remarks: No adverse effects expected :
Marlex® HHM 5502BN Polyeth CMR effects :	ylene Carcinogenicity: No adverse effects expected Mutagenicity: No adverse effects expected Reproductive toxicity: No adverse effects expected
11.2	
Information on other hazards	
Marlex® HHM 5502BN Polyeth Further information	ylene This product contains POLYMERIZED OLEFINS. During thermal processing (>350°F, >177°C) polyolefins can release vapors and gases (aldehydes,ketones and organic acids) which are irritating to the mucous membranes of the eyes, mouth, throat, and lungs. Generally these irritant effects are all transitory. However, prolonged exposure to irritating off-gases can lead to pulmonary edema. Formaldehyde (an aldehyde)
SDS Number:10000000723	9/15

Marlex® HHM 5502BN F	SAFETY DATA SHEE Polyethylene
Version 1.12	Revision Date 2023-08-0
	has been classified as a carcinogen based on animal data and limited epidemiological evidence.
Endocrine disrupting properties	 The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.
SECTION 12: Ecological informa	tion
12.1 Toxicity	
Ecotoxicity effects	
Toxicity to fish	: Not a hazardous substance or mixture.
Toxicity to daphnia and other aquatic invertebrates	: No data available
12.2 Persistence and degradabili	ty
Biodegradability	: Result: This material is not expected to be readily biodegradable.
12.3 Bioaccumulative potential Elimination information (persis	tence and degradability)
Bioaccumulation	: Does not bioaccumulate.
12.4 Mobility in soil	
Mobility	: The product is insoluble and floats on water.
12.5 Results of PBT and vPvB as	sessment
Results of PBT assessment	 This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.
12.6 Endocrine disrupting prope	ties
Endocrine disrupting properties	: The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.
12.7	
Other adverse effects	

Г

SAFETY DATA SHEET

Version 1.12

Revision Date 2023-08-07

	Additional ecological information	:	This material is not expected to be harmful to aquatic organisms., Fish or birds may eat pellets which may obstruct their digestive tracts.
12.8	Additional Information		
	Ecotoxicology Assessment		
	Short-term (acute) aquatic hazard	:	This material is not expected to be harmful to aquatic organisms.
	Long-term (chronic) aquatic hazard	:	This material is not expected to be harmful to aquatic organisms.

SECTION 13: Disposal considerations

13.1

Waste treatment methods

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

SECTION 14: Transport information

14.1 - 14.7

Transport information

The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.

SAFETY DATA SHEET

Version 1.12

Revision Date 2023-08-07

Annex

1. Short title of Exposure Scenario: Manufacture of plastics products

3. Exposure estimation and reference to its source

4. Guidance to Downstream User to evaluate whether he works inside the boundaries set by the Exposure Scenario

> compounding and conversion : **PC0:** Other (use UCN codes)

compression, extrusion, pelletization

: **SU12:** Manufacture of plastics products, including

: **PROC14:** Production of preparations or articles by tabletting,

1. Short title of Exposure Scenario:

Sector of use

Product category

Process category

Article category

- : AC 0: Other Articles
- 3. Exposure estimation and reference to its source

4. Guidance to Downstream User to evaluate whether he works inside the boundaries set by the Exposure Scenario
