

**AlphaPlus<sup>®</sup> 1-Decene**

Version 2.15

Revision Date 2023-10-30

According to Regulation (EC) No. 1907/2006, Regulation (EC) No. 2020/878

**SECTION 1: Identification of the substance/mixture and of the company/undertaking****1.1 Product identifier****Product information**

Product Name : AlphaPlus<sup>®</sup> 1-Decene  
 Material : 1128500, 1095875, 1068252, 1037000, 1015428, 1036999

**EC-No.Registration number**

Chemical name	CAS-No. EC-No. Index No.	Legal Entity Registration number
1-Decene	872-05-9 212-819-2	Chevron Phillips Chemical Company LP 01-2119486878-12-0006

**1.2****Relevant identified uses of the substance or mixture and uses advised against**

Relevant Identified Uses Supported : Manufacture  
 Use as an intermediate  
 Formulation  
 Use in coatings – industrial  
 Use in coatings – professional  
 Use in Coatings - Consumer  
 Use in Oil and Gas field drilling and production operations - Industrial  
 Use in polymer production – industrial

**1.3****Details of the supplier of the safety data sheet**

**Company** : Chevron Phillips Chemical Company LP  
 Normal Alpha Olefins (NAO)  
 10001 Six Pines Drive  
 The Woodlands, TX 77380

**Local** : Chevron Phillips Chemicals International N.V.  
 Airport Plaza (Stockholm Building)  
 Leonardo Da Vincilaan 19  
 1831 Diegem  
 Belgium

SDS Requests: (800) 852-5530

**SECTION 2: Hazards identification****2.1****Classification of the substance or mixture**

SDS Number:100000068089

2/88

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

**REGULATION (EC) No 1272/2008**

Flammable liquids, Category 3

H226:

Flammable liquid and vapor.

Aspiration hazard, Category 1

H304:

May be fatal if swallowed and enters airways.

Short-term (acute) aquatic hazard,  
Category 1

H400:

Very toxic to aquatic life.

Long-term (chronic) aquatic hazard,  
Category 1

H410:

Very toxic to aquatic life with long lasting effects.

**2.2****Labeling (REGULATION (EC) No 1272/2008)**

Hazard pictograms

:

Signal Word

: Danger

Hazard Statements

: H226  
H304

Flammable liquid and vapor.

May be fatal if swallowed and enters  
airways.

H410

Very toxic to aquatic life with long lasting  
effects.

Precautionary Statements

: **Prevention:**  
P210Keep away from heat, hot surfaces, sparks,  
open flames and other ignition sources. No  
smoking.

P273

Avoid release to the environment.

**Response:**

P301 + P310

IF SWALLOWED: Immediately call a  
POISON CENTER/ doctor.

P331

Do NOT induce vomiting.

P370 + P378

In case of fire: Use dry sand, dry chemical  
or alcohol-resistant foam to extinguish.

P391

Collect spillage.

Hazardous ingredients which must be listed on the label:

- 872-05-9 1-Decene

**2.3****Other hazards**Results of PBT and vPvB  
assessment: This substance/mixture contains no components considered to  
be either persistent, bioaccumulative and toxic (PBT), or very  
persistent and very bioaccumulative (vPvB) at levels of 0.1%  
or higher.Endocrine disrupting  
properties: The substance/mixture does not contain components  
considered to have endocrine disrupting properties according  
to REACH Article 57(f) or Commission Delegated regulation

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

(EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

**SECTION 3: Composition/information on ingredients****3.1 - 3.2****Substance or Mixture**

Synonyms : Decene-n-1  
NAO 10  
Decene-1 (C10)  
(C10 H20)

Molecular formula : C10H20

**Hazardous ingredients**

Chemical name	CAS-No. EC-No. Index No.	Classification (REGULATION (EC) No 1272/2008)	Concentration [wt%]	Specific Conc. Limits, M-factors and ATEs
<b>1-Decene</b>	<b>872-05-9</b> <b>212-819-2</b>	Flam. Liq. 3; H226 Asp. Tox. 1; H304 Aquatic Acute 1; H400 Aquatic Chronic 1; H410	96 - 100	M [Acute]=1 M [Chronic]=1
2-Butyl-1-Hexene	6795-79-5	Flam. Liq. 3; H226 Asp. Tox. 1; H304	1 - 5	
2-Ethyl-1-Octene	51655-64-2	Flam. Liq. 3; H226 Asp. Tox. 1; H304	1 - 5	

For the full text of the H-Statements mentioned in this Section, see Section 16.

**SECTION 4: First aid measures****4.1****Description of first-aid measures**

General advice : Move out of dangerous area. Show this material safety data sheet to the doctor in attendance. Material may produce a serious, potentially fatal pneumonia if swallowed or vomited.

If inhaled : If unconscious, place in recovery position and seek medical advice. If symptoms persist, call a physician.

In case of skin contact : If on skin, rinse well with water. If on clothes, remove clothes.

In case of eye contact : Flush eyes with water as a precaution. Remove contact lenses. Protect unharmed eye. Keep eye wide open while rinsing. If eye irritation persists, consult a specialist.

If swallowed : Keep respiratory tract clear. Never give anything by mouth to an unconscious person. If symptoms persist, call a physician. Take victim immediately to hospital.

**4.2 Most important symptoms and effects, both acute and delayed****Notes to physician**

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

Symptoms : No data available.

Risks : No data available.

**4.3 Indication of any immediate medical attention and special treatment needed**

Treatment : No data available.

**SECTION 5: Firefighting measures**Flash point : 49°C (120°F)  
Method: closed cup

Autoignition temperature : 210°C (410°F)

**5.1****Extinguishing media**Suitable extinguishing media : Alcohol-resistant foam. Carbon dioxide (CO<sub>2</sub>). Dry chemical.

Unsuitable extinguishing media : High volume water jet.

**5.2****Special hazards arising from the substance or mixture**

Specific hazards during fire fighting : Do not allow run-off from fire fighting to enter drains or water courses.

**5.3****Advice for firefighters**

Special protective equipment for fire-fighters : Wear self-contained breathing apparatus for firefighting if necessary.

Further information : Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Fire residues and contaminated fire extinguishing water must be disposed of in accordance with local regulations. For safety reasons in case of fire, cans should be stored separately in closed containments. Use a water spray to cool fully closed containers.

Fire and explosion protection : Do not spray on a naked flame or any incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Keep away from open flames, hot surfaces and sources of ignition.

Hazardous decomposition products : Carbon oxides.

**SECTION 6: Accidental release measures****6.1****Personal precautions, protective equipment and emergency procedures**

Personal precautions : Use personal protective equipment. Ensure adequate ventilation. Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapors accumulating to form explosive concentrations. Vapors can accumulate in low areas.

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

**6.2****Environmental precautions**

Environmental precautions : Prevent product from entering drains. Prevent further leakage or spillage if safe to do so. If the product contaminates rivers and lakes or drains inform respective authorities.

**6.3****Methods and materials for containment and cleaning up**

Methods for cleaning up : Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).

**6.4****Reference to other sections**

Reference to other sections : For personal protection see section 8. For disposal considerations see section 13.

**SECTION 7: Handling and storage****7.1****Precautions for safe handling  
Handling**

Advice on safe handling : Avoid formation of aerosol. Do not breathe vapors/dust. For personal protection see section 8. Smoking, eating and drinking should be prohibited in the application area. Take precautionary measures against static discharges. Provide sufficient air exchange and/or exhaust in work rooms. Open drum carefully as content may be under pressure. Dispose of rinse water in accordance with local and national regulations.

Advice on protection against fire and explosion : Do not spray on a naked flame or any incandescent material. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapors). Keep away from open flames, hot surfaces and sources of ignition.

**7.2****Conditions for safe storage, including any incompatibilities****Storage**

Requirements for storage areas and containers : No smoking. Keep container tightly closed in a dry and well-ventilated place. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Observe label precautions. Electrical installations / working materials must comply with the technological safety standards.

**SECTION 8: Exposure controls/personal protection****8.1****Control parameters**

PNEC : Fresh water

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

	Value: 0,0012 mg/l
PNEC	: Sea water Value: 0,0012 mg/l
PNEC	: Fresh water sediment Value: 2,14 mg/kg
PNEC	: Sea sediment Value: 2,14 mg/kg
PNEC	: Soil Value: 0,43 mg/kg

**8.2****Exposure controls  
Engineering measures**

Adequate ventilation to control airborne concentrations below the exposure guidelines/limits. Consider the potential hazards of this material (see Section 2), applicable exposure limits, job activities, and other substances in the work place when designing engineering controls and selecting personal protective equipment. If engineering controls or work practices are not adequate to prevent exposure to harmful levels of this material, the personal protective equipment listed below is recommended. The user should read and understand all instructions and limitations supplied with the equipment since protection is usually provided for a limited time or under certain circumstances.

**Personal protective equipment**

Respiratory protection	: If ventilation or other engineering controls are not adequate to maintain minimal oxygen content of 19.5% by volume under normal atmospheric pressure, a supplied-air NIOSH approved respirator may be appropriate. If exposure to harmful levels of airborne material may occur, a NIOSH approved respirator that provides protection may be appropriate, such as:. Air-Purifying Respirator for Organic Vapors. A positive pressure, air-supplying respirator may be appropriate if there is potential for uncontrolled release, aerosolization, exposure levels are not known, or other circumstances where air-purifying respirators may not provide adequate protection.
Hand protection	: The suitability for a specific workplace should be discussed with the producers of the protective gloves. Please observe the instructions regarding permeability and breakthrough time which are provided by the supplier of the gloves. Also take into consideration the specific local conditions under which the product is used, such as the danger of cuts, abrasion, and the contact time. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.
Eye protection	: Eye wash bottle with pure water. Tightly fitting safety goggles.
Skin and body protection	: Choose body protection in relation to its type, to the concentration and amount of dangerous substances, and to the specific work-place. Wear as appropriate:. Flame retardant antistatic protective clothing. Workers should wear antistatic footwear.
Hygiene measures	: When using do not eat or drink. When using do not smoke.

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

Wash hands before breaks and at the end of workday.

For additional details, see the Exposure Scenario in the Annex portion

**SECTION 9: Physical and chemical properties****9.1****Information on basic physical and chemical properties****Appearance**

Form : liquid  
 Physical state : liquid  
 Color : Clear, colorless

**Safety data**

Flash point : 49°C (120°F)  
 Method: closed cup

Lower explosion limit : 0,7 %(V)

Upper explosion limit : 5,9 %(V)

Oxidizing properties : no

Autoignition temperature : 210°C (410°F)

Thermal decomposition : No data available

Molecular formula : C<sub>10</sub>H<sub>20</sub>

Molecular weight : 140,3 g/mol

pH : Not applicable

Freezing point : -66°C (-87°F)

Pour point : No data available

Boiling point/boiling range : 170,56°C (339,01°F)

Vapor pressure : 0,21 kPa  
 at 25°C (77°F)  
 2,30 kPa  
 at 65°C (149°F)

Relative density : 0,75  
 at 15,6 °C (60,1 °F)

Density : 745 kg/m<sup>3</sup>  
 at 15°C (59°F)  
 740 kg/m<sup>3</sup>  
 at 20°C (68°F)

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

	717 kg/m <sup>3</sup> at 50°C (122°F)
Water solubility	: Soluble in hydrocarbon solvents; insoluble in water.
Partition coefficient: n-octanol/water	: No data available
Viscosity, kinematic	: 1,1 cSt at 20°C (68°F)
Relative vapor density	: 4,84 (Air = 1.0)
Evaporation rate	: No data available

**SECTION 10: Stability and reactivity****10.1**

**Reactivity** : Stable at normal ambient temperature and pressure.

**10.2**

**Chemical stability** : This material is considered stable under normal ambient and anticipated storage and handling conditions of temperature and pressure.

**10.3****Possibility of hazardous reactions**

**Hazardous reactions** : Hazardous reactions: Hazardous polymerization does not occur.

Further information: No decomposition if stored and applied as directed.

Hazardous reactions: Vapors may form explosive mixture with air.

**10.4**

**Conditions to avoid** : Heat, flames and sparks.

**10.5**

**Materials to avoid** : May react with oxygen and strong oxidizing agents, such as chlorates, nitrates, peroxides, etc.

**Thermal decomposition** : No data available

**10.6**

**Hazardous decomposition products** : Carbon oxides

**Other data** : No decomposition if stored and applied as directed.

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

**SECTION 11: Toxicological information****11.1****Information on toxicological effects****Acute oral toxicity**

1-Decene : LD50: > 3.575 mg/kg  
Species: Rat  
Sex: male and female  
Method: Fixed Dose Method  
Information given is based on data obtained from similar substances.

**Acute inhalation toxicity**

1-Decene : LC50: > 2,1 mg/l  
Exposure time: 4 h  
Species: Rat  
Sex: male and female  
Test atmosphere: vapor  
Method: OECD Test Guideline 403  
Information given is based on data obtained from similar substances.  
Not classified due to data which are conclusive although insufficient for classification.

**Acute dermal toxicity**

1-Decene : LD50: > 2.000 mg/kg  
Species: Rat  
Sex: male and female  
Method: OECD Test Guideline 402  
Information given is based on data obtained from similar substances.

**Skin irritation**

1-Decene : Repeated or prolonged contact with the mixture may cause removal of natural fat from the skin resulting in desiccation of the skin.

**Eye irritation**

1-Decene : No eye irritation

**Sensitization**

1-Decene : Did not cause sensitization on laboratory animals.  
Information given is based on data obtained from similar substances.

**Repeated dose toxicity**

1-Decene : Species: Rat, Male and female  
Sex: Male and female  
Application Route: Oral  
Dose: 0, 100, 500, 1000 mg/kg  
Exposure time: 13 wks

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

Number of exposures: 7 d/wk  
 NOEL: 1.000 mg/kg  
 Method: OCED Guideline 408  
 Information given is based on data obtained from similar substances.

Species: Rat, Male and female  
 Sex: Male and female  
 Application Route: Inhalation  
 Dose: 0, 300, 1000, 3000 ppm  
 Exposure time: 13 wks  
 Number of exposures: 6 hr/d, 5 d/wk  
 NOEL: 3000 ppm  
 Method: OECD Guideline 413  
 Information given is based on data obtained from similar substances.

**Genotoxicity in vitro**

1-Decene : Test Type: Ames test  
 Metabolic activation: with and without metabolic activation  
 Method: Mutagenicity (Escherichia coli - reverse mutation assay)  
 Result: negative

Test Type: Mammalian cell gene mutation assay  
 Metabolic activation: with and without metabolic activation  
 Method: OECD Guideline 476  
 Result: negative

Test Type: Chromosome aberration test in vitro  
 Metabolic activation: with and without metabolic activation  
 Method: OECD Guideline 473  
 Result: negative

**Genotoxicity in vivo**

1-Decene : Test Type: Micronucleus test  
 Species: Mouse  
 Method: Mutagenicity (micronucleus test)  
 Result: negative

**Reproductive toxicity**

1-Decene : Species: Rat  
 Sex: male  
 Application Route: Oral diet  
 Dose: 0, 100, 500, 1000 mg/kg  
 Method: OECD Guideline 421  
 NOAEL Parent: 1.000 mg/kg  
 NOAEL F1: 1.000 mg/kg

**AlphaPlus® 1-Decene  
Aspiration toxicity**

: May be fatal if swallowed and enters airways.  
 Substances known to cause human aspiration toxicity hazards or to be regarded as if they cause human aspiration toxicity hazard.

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

**CMR effects**

1-Decene : Carcinogenicity: Not available  
 Mutagenicity: Tests on bacterial or mammalian cell cultures did not show mutagenic effects.  
 Teratogenicity: Animal testing did not show any effects on fetal development.  
 Reproductive toxicity: Animal testing did not show any effects on fertility.

**11.2****Information on other hazards****AlphaPlus® 1-Decene****Further information**

Endocrine disrupting properties : Solvents may degrease the skin.  
 : The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

**SECTION 12: Ecological information****12.1****Toxicity****Toxicity to fish**

1-Decene : LC50: 0,12 mg/l  
 Exposure time: 96 h  
 Species: Oncorhynchus mykiss (rainbow trout)  
 semi-static test Method: OECD Test Guideline 203  
 Information given is based on data obtained from similar substances.

**Toxicity to daphnia and other aquatic invertebrates**

1-Decene : EC50: 0,56 - 1 mg/l  
 Exposure time: 48 h  
 Species: Daphnia  
 Method: OECD Test Guideline 202

**Toxicity to algae**

1-Decene : EC50: 1 - 1,8 mg/l  
 Exposure time: 72 h  
 Species: Pseudokirchneriella subcapitata (microalgae)  
 Method: OECD Test Guideline 201

**M-Factor**

dec-1-ene : M-Factor (Acute Aquat. Tox.) 1  
 M-Factor (Chron. Aquat. Tox.) 1

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

**Toxicity to daphnia and other aquatic invertebrates (Chronic toxicity)**

1-Decene : NOEC: 0,0194 mg/l  
Exposure time: 21 d  
Species: Daphnia magna (Water flea)  
Analytical monitoring: yes  
Test substance: yes  
Method: OECD Test Guideline 211

**12.2****Persistence and degradability**

Biodegradability : This material is expected to be readily biodegradable.

**12.3****Bioaccumulative potential**

Elimination information (persistence and degradability)

Bioaccumulation

1-Decene : No data available

**12.4****Mobility in soil**

Mobility

1-Decene : No data available

**12.5****Results of PBT and vPvB assessment**

Results of PBT assessment : This substance/mixture contains no components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

**12.6****Endocrine disrupting properties**

Endocrine disrupting properties : The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

**12.7****Other adverse effects**

Additional ecological information : An environmental hazard cannot be excluded in the event of unprofessional handling or disposal., Very toxic to aquatic life with long lasting effects.

**12.8****Additional Information****Ecotoxicology Assessment**

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

Short-term (acute) aquatic hazard  
 1-Decene : Very toxic to aquatic life.

Long-term (chronic) aquatic hazard  
 1-Decene : Very toxic to aquatic life with long lasting effects.

**SECTION 13: Disposal considerations****13.1****Waste treatment methods**

The information in this SDS pertains only to the product as shipped.

Use material for its intended purpose or recycle if possible. This material, if it must be discarded, may meet the criteria of a hazardous waste as defined by US EPA under RCRA (40 CFR 261) or other State and local regulations. Measurement of certain physical properties and analysis for regulated components may be necessary to make a correct determination. If this material is classified as a hazardous waste, federal law requires disposal at a licensed hazardous waste disposal facility.

Product : The product should not be allowed to enter drains, water courses or the soil. Do not contaminate ponds, waterways or ditches with chemical or used container. Send to a licensed waste management company.

Contaminated packaging : Empty remaining contents. Dispose of as unused product. Do not re-use empty containers. Do not burn, or use a cutting torch on, the empty drum.

For additional details, see the Exposure Scenario in the Annex portion

**SECTION 14: Transport information****14.1 - 14.7****Transport information**

**The shipping descriptions shown here are for bulk shipments only, and may not apply to shipments in non-bulk packages (see regulatory definition).**

Consult the appropriate domestic or international mode-specific and quantity-specific Dangerous Goods Regulations for additional shipping description requirements (e.g., technical name or names, etc.) Therefore, the information shown here, may not always agree with the bill of lading shipping description for the material. Flashpoints for the material may vary slightly between the SDS and the bill of lading.

**1.2. Conditions of use affecting exposure**

**1.2.1. Control of environmental exposure: Manufacture of the substance (ERC1) / Use of non-reactive processing aid at industrial site (no inclusion into or onto article) (ERC4)**

**Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

**Amount used (or contained in articles), frequency and duration of use/exposure**

Maximum allowable site tonnage (MSafe)	: 352.467 kg/day
Release type	: Continuous release
Emission days	: 300

**Technical and organisational conditions and measures**

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

Risk from environmental exposure is driven by freshwater.

Air - minimum efficiency of 90 %

Water - minimum efficiency of 97,4 %

**Conditions and measures related to sewage treatment plant**

STP type	:	Municipal sewage treatment plant
STP sludge treatment	:	Prevent discharge of undissolved substance to or recover from wastewater. Do not apply industrial sludge to natural soils. Sewage sludge should be incinerated, contained or reclaimed.
STP effluent	:	2.000 m3/d

**Conditions and measures related to treatment of waste (including article waste)**

Waste treatment	:	External treatment and disposal of waste should comply with applicable local and/or national regulations.
-----------------	---	---

**Other conditions affecting environmental exposure**

Receiving surface water flow : 18.000 m3/d

Local freshwater dilution factor : 40

Local marine water dilution factor : 100

**1.2.2. Control of worker exposure: Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions (PROC1)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product	:	Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure
--------------------------	---	--

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration	:	Covers daily exposures up to 8 hours
----------	---	--------------------------------------

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.  
Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature	:	Assumes use at not more than 20°C above ambient temperature.
-------------	---	--

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

**1.2.3. Control of worker exposure: Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions (PROC2)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure &lt; 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.  
 Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
 No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**1.2.4. Control of worker exposure: Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition (PROC3)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure &lt; 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.  
 Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
 No other specific measures identified.

Version 2.15

Revision Date 2023-10-30

Temperature : Assumes use at not more than 20°C above ambient temperature.

**1.3. Exposure estimation and reference to its source****1.3.1. Environmental release and exposure: Manufacture of the substance (ERC1) / Use of non-reactive processing aid at industrial site (no inclusion into or onto article) (ERC4)**

Protection Target	Exposure estimate	RCR
Freshwater	0,795 µg/l (EUSES)	0,662
Sea water	0,302 µg/l (EUSES)	0,252
Freshwater sediment	0,306 mg/kg wet weight (EUSES)	0,658
Sea sediment	0,116 mg/kg wet weight (EUSES)	0,250
Soil	0,0117 mg/kg wet weight (EUSES)	0,301
Air	0,0649 mg/m <sup>3</sup>	

**Additional information on exposure estimation**

Common practices vary across sites thus conservative process release estimates used.

**1.3.2. Worker exposure: Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions (PROC1)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**1.3.3. Worker exposure: Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions (PROC2)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**1.3.4. Worker exposure: Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition (PROC3)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**1.3.5. Worker exposure: Chemical production where opportunity for exposure arises (PROC4)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

**1.3.6. Worker exposure: Transfer of substance or mixture (charging/discharging) at non dedicated-facilities (PROC8a)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**1.3.7. Worker exposure: Transfer of substance or mixture (charging/discharging) at dedicated facilities (PROC8b)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**1.3.8. Worker exposure: Use as laboratory reagent (PROC15)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**1.4. Guidance to DU to evaluate whether he works inside the boundaries set by the ES**

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org/en/reach-for-industries-libraries.html>).

**2.3.6. Worker exposure: Transfer of substance or mixture (charging/discharging) at non dedicated-facilities (PROC8a)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**2.3.7. Worker exposure: Transfer of substance or mixture (charging/discharging) at dedicated facilities (PROC8b)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**2.3.8. Worker exposure: Use as laboratory reagent (PROC15)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**2.4. Guidance to DU to evaluate whether he works inside the boundaries set by the ES**

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org/en/reach-for-industries-libraries.html>).

Version 2.15

Revision Date 2023-10-30

Emission days : 300

**Technical and organisational conditions and measures**

Risk from environmental exposure is driven by soil.

Air - minimum efficiency of 0 %

Water - minimum efficiency of 97,4 %

**Conditions and measures related to sewage treatment plant**

STP type : Municipal sewage treatment plant

STP sludge treatment : Prevent discharge of undissolved substance to or recover from wastewater.  
Do not apply industrial sludge to natural soils.  
Sewage sludge should be incinerated, contained or reclaimed.

STP effluent : 2.000 m3/d

**Conditions and measures related to treatment of waste (including article waste)**

Waste treatment : External treatment and disposal of waste should comply with applicable local and/or national regulations.

**Other conditions affecting environmental exposure**

Receiving surface water flow : 18.000 m3/d

Local freshwater dilution factor : 10

Local marine water dilution factor : 100

**3.2.2. Control of worker exposure: Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions (PROC1)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure &lt; 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.

Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.

No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient

Temperature : Assumes use at not more than 20°C above ambient temperature.

**4.2.12. Control of worker exposure: Treatment of articles by dipping and pouring (PROC13)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.  
 Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
 No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**4.2.13. Control of worker exposure: Tableting, compression, extrusion, pelettisation, granulation (PROC14)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.  
 Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
 No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**4.2.14. Control of worker exposure: Use as laboratory reagent (PROC15)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**AlphaPlus® 1-Decene**

Revision Date 2023-10-30

**4.3.4. Worker exposure: Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition (PROC3)**

**Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**4.3.5. Worker exposure: Chemical production where opportunity for exposure arises (PROC4)**

**Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**4.3.6. Worker exposure: Mixing or blending in batch processes (PROC5)**

**Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**4.3.7. Worker exposure: Industrial spraying (PROC7)**

**Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**4.3.8. Worker exposure: Transfer of substance or mixture (charging/discharging) at non dedicated-facilities (PROC8a)**

**Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**4.3.9. Worker exposure: Transfer of substance or mixture (charging/discharging) at dedicated facilities (PROC8b)**

**Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**4.3.10. Worker exposure: Transfer of substance or mixture into small containers (dedicated filling line, including weighing) (PROC9)**

**Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**4.3.11. Worker exposure: Roller application or brushing (PROC10)**

**Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

**4.3.12. Worker exposure: Treatment of articles by dipping and pouring (PROC13)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**4.3.13. Worker exposure: Tableting, compression, extrusion, pelettisation, granulation (PROC14)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**4.3.14. Worker exposure: Use as laboratory reagent (PROC15)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**4.4. Guidance to DU to evaluate whether he works inside the boundaries set by the ES**

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org/en/reach-for-industries-libraries.html>).

**5.2. Conditions of use affecting exposure**

**5.2.1. Control of environmental exposure: Widespread use of non-reactive processing aid (no inclusion into or onto article, indoor) (ERC8a) / Widespread use of non-reactive processing aid (no inclusion into or onto article, outdoor) (ERC8d)**

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

**Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

**Amount used (or contained in articles), frequency and duration of use/exposure**Maximum allowable site tonnage : 52 kg/day  
(MSafe)

Release type : Wide dispersive use

Emission days : 300

**Technical and organisational conditions and measures**

Risk from environmental exposure is driven by soil.

Air - minimum efficiency of 0 %

Water - minimum efficiency of 97,4 %

**Conditions and measures related to sewage treatment plant**

STP type : Municipal sewage treatment plant

STP sludge treatment : Prevent discharge of undissolved substance to or recover from wastewater.  
Do not apply industrial sludge to natural soils.  
Sewage sludge should be incinerated, contained or reclaimed.

STP effluent : 2.000 m3/d

**Conditions and measures related to treatment of waste (including article waste)**

Waste treatment : External treatment and disposal of waste should comply with applicable local and/or national regulations.

**Other conditions affecting environmental exposure**

Receiving surface water flow : 18.000 m3/d

Local freshwater dilution factor : 10

Local marine water dilution factor : 100

**5.2.2. Control of worker exposure: Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions (PROC1)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure &lt; 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Conditions and measures related to personal protection, hygiene and health evaluation**

Do not ingest. If swallowed then seek immediate medical assistance.  
 Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
 No other specific measures identified.

**Other conditions affecting consumers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**6.2.4. Control of consumer exposure: Biocidal products (PC8)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure &lt; 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Conditions and measures related to personal protection, hygiene and health evaluation**

Do not ingest. If swallowed then seek immediate medical assistance.  
 Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
 No other specific measures identified.

**Other conditions affecting consumers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**6.2.5. Control of consumer exposure: Coatings and paints, thinners, paint removers (PC9a)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

A quantitative risk assessment is not required for human health.

**6.3.13. Consumer exposure: Textile dyes and impregnating products (PC34)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**6.4. Guidance to DU to evaluate whether he works inside the boundaries set by the ES**

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org/en/reach-for-industries-libraries.html>).

Covers percentage substance in the product up to 100 %.

**Amount used (or contained in articles), frequency and duration of use/exposure**

Release type : Continuous release

Remarks : Not applicable

**Technical and organisational conditions and measures**

Discharge to aquatic environment is restricted (see section 4.2).

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

**Conditions and measures related to sewage treatment plant**

STP type : Municipal sewage treatment plant  
 STP sludge treatment : Prevent environmental discharge consistent with regulatory requirements.

**Conditions and measures related to treatment of waste (including article waste)**

Waste treatment : External treatment and disposal of waste should comply with applicable local and/or national regulations.

**7.2.2. Control of worker exposure: Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions (PROC1)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.  
 Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
 No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**7.2.3. Control of worker exposure: Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions (PROC2)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**AlphaPlus® 1-Decene**

Revision Date 2023-10-30

Maximum allowable site tonnage : 51.203 kg/day  
(MSafe)

Release type : Continuous release

Emission days : 300

**Technical and organisational conditions and measures**

Risk from environmental exposure is driven by soil.

Air - minimum efficiency of 80 %

Water - minimum efficiency of 97,4 %

**Conditions and measures related to sewage treatment plant**

STP type : Municipal sewage treatment plant

STP sludge treatment : Prevent discharge of undissolved substance to or recover from wastewater.  
Do not apply industrial sludge to natural soils.  
Sewage sludge should be incinerated, contained or reclaimed.

STP effluent : 2.000 m3/d

**Conditions and measures related to treatment of waste (including article waste)**

Waste treatment : External treatment and disposal of waste should comply with applicable local and/or national regulations.

**Other conditions affecting environmental exposure**

Receiving surface water flow : 18.000 m3/d

Local freshwater dilution factor : 10

Local marine water dilution factor : 100

**8.2.2. Control of worker exposure: Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions (PROC1)****Product (article) characteristics**

minimise exposures and to report any skin problems that may develop.  
No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**8.2.5. Control of worker exposure: Chemical production where opportunity for exposure arises (PROC4)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.  
Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**8.2.6. Control of worker exposure: Mixing or blending in batch processes (PROC5)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.

minimise exposures and to report any skin problems that may develop.  
No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**8.2.7. Control of worker exposure: Calendering operations (PROC6)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.  
Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**8.2.8. Control of worker exposure: Transfer of substance or mixture (charging/discharging) at non dedicated-facilities (PROC8a)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.  
Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. minimise exposures and to report any skin problems that may develop.  
No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**8.2.9. Control of worker exposure: Transfer of substance or mixture (charging/discharging) at dedicated facilities (PROC8b)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.  
Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**8.2.10. Control of worker exposure: Tableting, compression, extrusion, pelettisation, granulation (PROC14)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.  
Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they

occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**8.2.11. Control of worker exposure: Low energy manipulation and handling of substances bound in/on materials and/or articles (PROC21)****Product (article) characteristics**

Covers percentage substance in the product up to 100 %.

Physical form of product : Liquid, vapour pressure < 0.5 kPa at Standard Temperature and Pressure

**Amount used (or contained in articles), frequency and duration of use/exposure**

Duration : Covers daily exposures up to 8 hours

**Technical and organisational conditions and measures**

Do not ingest. If swallowed then seek immediate medical assistance.  
Avoid direct skin contact with product. Identify potential areas for indirect skin contact. Wear gloves (tested to EN374) if hand contact with substance likely. Clean up contamination/spills as soon as they occur. Wash off any skin contamination immediately. Provide basic employee training to prevent / minimise exposures and to report any skin problems that may develop.  
No other specific measures identified.

**Other conditions affecting workers exposure**

Temperature : Assumes use at not more than 20°C above ambient temperature.

**8.3. Exposure estimation and reference to its source****8.3.1. Environmental release and exposure: Use of non-reactive processing aid at industrial site (no inclusion into or onto article) (ERC4) / Use of monomer in polymerisation processes at industrial site (inclusion or not into/onto article) (ERC6c)**

Protection Target	Exposure estimate	RCR
Freshwater	0,476 µg/l (EUSES)	0,396
Sea water	0,0468 µg/l (EUSES)	0,039
Freshwater sediment	0,183 mg/kg wet weight (EUSES)	0,394
Sea sediment	0,018 mg/kg wet weight (EUSES)	0,039
Soil	0,247 mg/kg wet weight (EUSES)	0,651
Air	0,0185 mg/m <sup>3</sup>	

**AlphaPlus® 1-Decene**

Revision Date 2023-10-30

**Additional information on exposure estimation**

Common practices vary across sites thus conservative process release estimates used.

**8.3.2. Worker exposure: Chemical production or refinery in closed process without likelihood of exposure or processes with equivalent containment conditions (PROC1)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**8.3.3. Worker exposure: Chemical production or refinery in closed continuous process with occasional controlled exposure or processes with equivalent containment conditions (PROC2)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**8.3.4. Worker exposure: Manufacture or formulation in the chemical industry in closed batch processes with occasional controlled exposure or processes with equivalent containment condition (PROC3)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**8.3.5. Worker exposure: Chemical production where opportunity for exposure arises (PROC4)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**8.3.6. Worker exposure: Mixing or blending in batch processes (PROC5)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**8.3.7. Worker exposure: Calendring operations (PROC6)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**8.3.8. Worker exposure: Transfer of substance or mixture (charging/discharging) at non dedicated-facilities (PROC8a)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**AlphaPlus® 1-Decene**

Version 2.15

Revision Date 2023-10-30

**8.3.9. Worker exposure: Transfer of substance or mixture (charging/discharging) at dedicated facilities (PROC8b)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**8.3.10. Worker exposure: Tableting, compression, extrusion, pelettisation, granulation (PROC14)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**8.3.11. Worker exposure: Low energy manipulation and handling of substances bound in/on materials and/or articles (PROC21)****Additional information on exposure estimation**

A quantitative risk assessment is not required for human health.

**8.4. Guidance to DU to evaluate whether he works inside the boundaries set by the ES**

Guidance is based on assumed operating conditions which may not be applicable to all sites; thus, scaling may be necessary to define appropriate site-specific risk management measures.

Required removal efficiency for wastewater can be achieved using onsite/offsite technologies, either alone or in combination.

Required removal efficiency for air can be achieved using on-site technologies, either alone or in combination.

Further details on scaling and control technologies are provided in SpERC factsheet (<http://cefic.org/en/reach-for-industries-libraries.html>).
